OBSERVATION

One of the three main missions of the OVSQ is observation. It consists of:

- » Participation in numerous space programs supported by CNES (National Centre for Space Studies) and ESA (European Space Agency),
- » Participation in international agreements to monitor the Earth's atmosphere,
- » Observation of the natural and social environments,
- » Proposal of a complete observation chain: development of instruments or protocols; collection, analysis, interpretation and provision of measurements.

Objective of this mission: to better understand the changes in our environment, including the socio-economic and health aspects
