

université PARIS-SACLAY

PRESENTATION OF THE TECHNICAL RESOURCES

- » **OVSQ's Platform for Integration and Testing (PIT)** provides the resources for instrumental integration and mechanical testing, some of which are in clean rooms. Thus, on-board instruments, space systems and various subsystems can go through their entire development, assembly, validation cycle at OVSQ. Testing resources are specialised for space and allow launches, atmospheric re-entry, orbital situations and Martian atmospheric conditions to be simulated.
- » All of the platform's equipment guarantees a high level of quality and safety for the personnel, tests and integrations.

ADDITIONAL INFORMATION

- » Integration halls
- » Clean rooms
- » Mechanical tests
- » Optical tests
- » Thermal tests
- » MIRE immersive platform
